

Mississippi Stud Progressive

Mississippi Stud Progressive is a five-card poker game in which you compete against a pay table, not against the Dealer, and you win if your Hand is a Pair of Jacks or better. The top payout is 500 to 1 for a Royal Flush - and it pays on all bets! Mississippi Stud Progressive also features a Progressive Bet that pays up to 100% of the jackpot for a Royal Flush.

The Bet

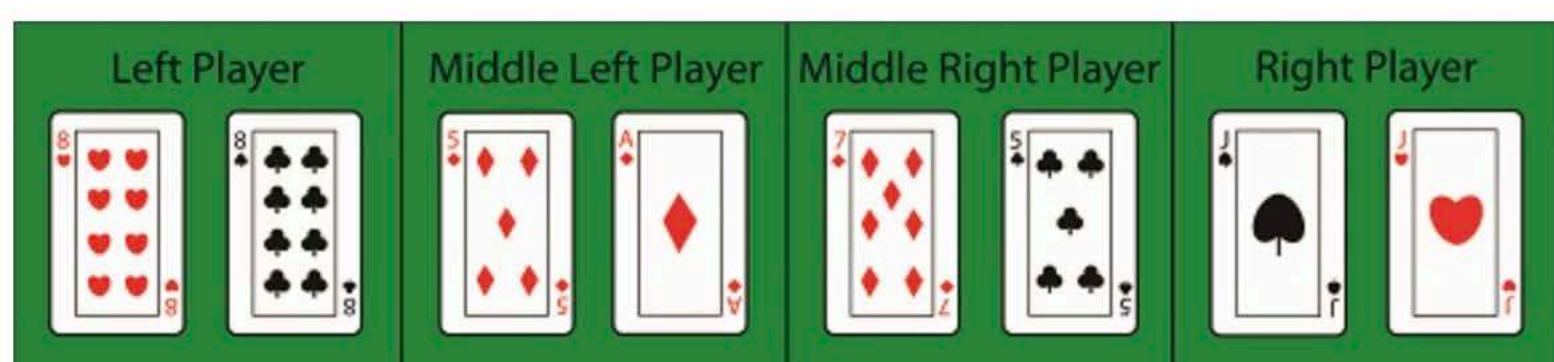

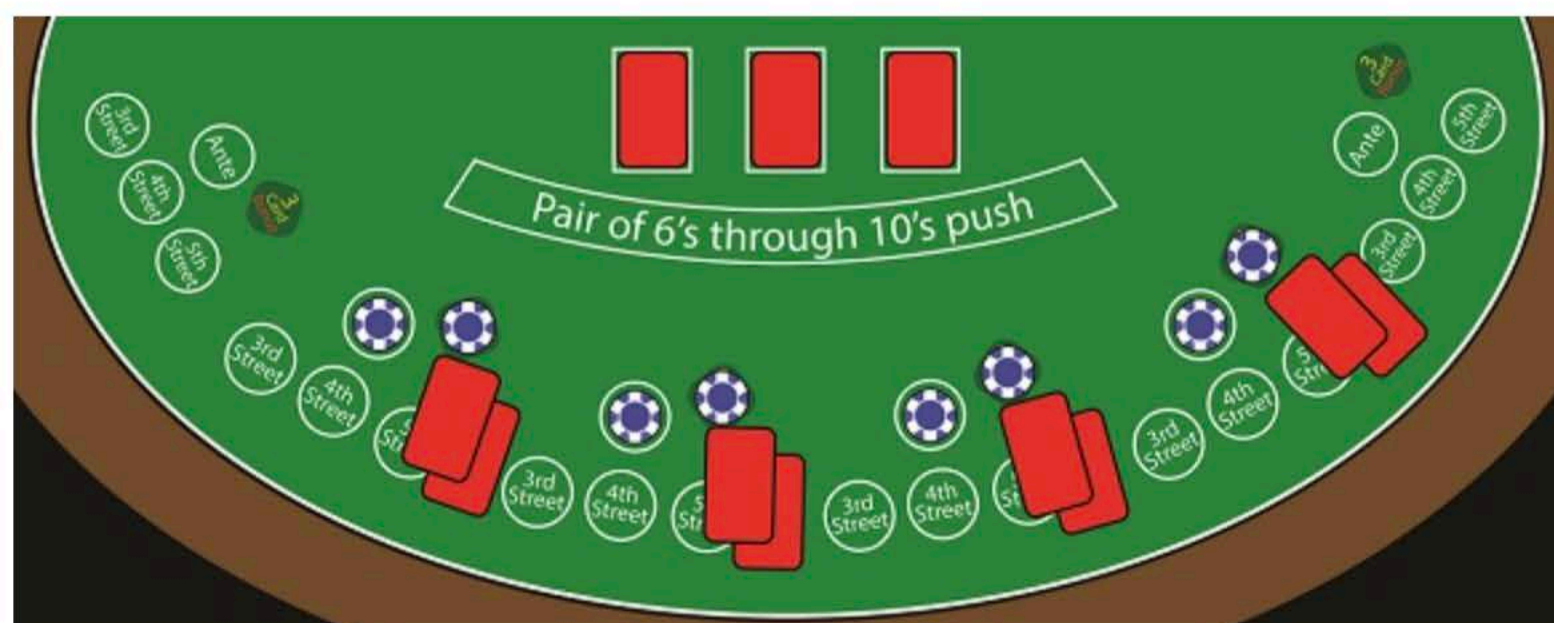

Players begin by making an Ante Bet, and they have the option to place a bet in the optional 3 Card Bonus wager.

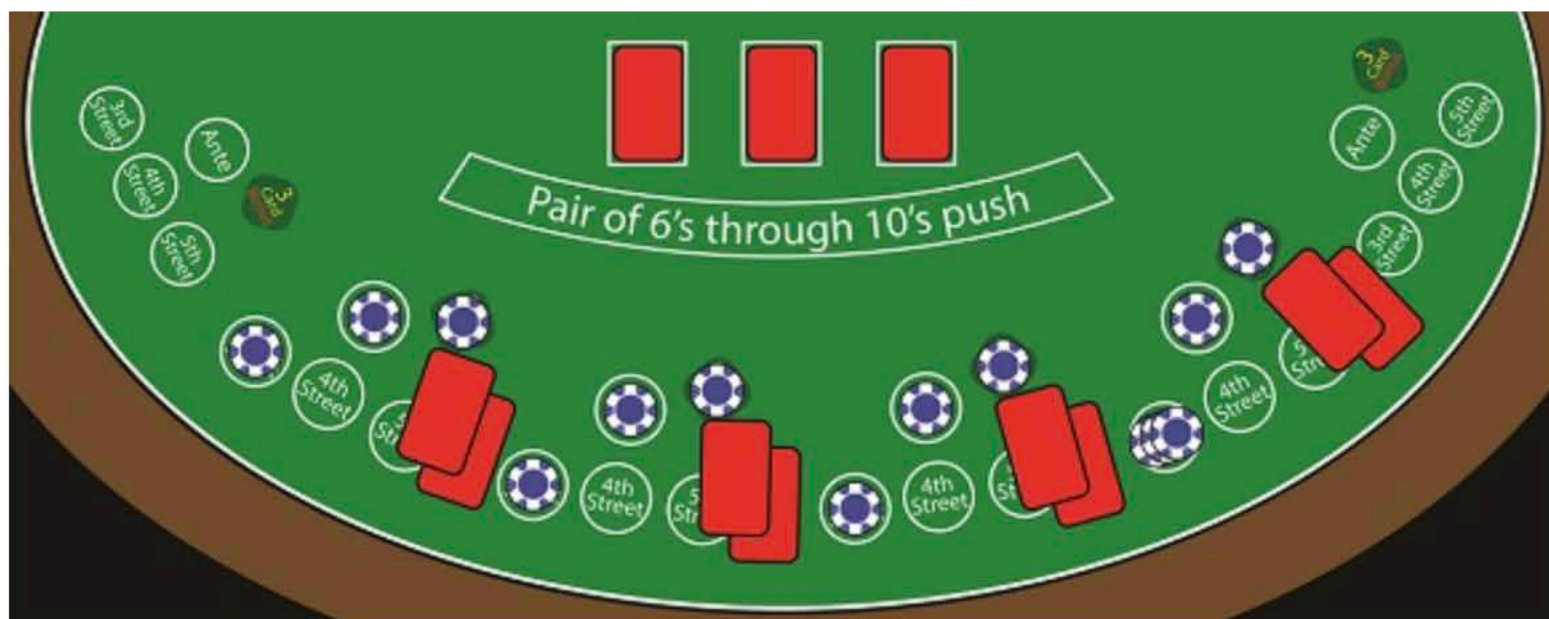

The Play

Once all the Players have finished placing their bets, the Dealer deals two face-down cards to each Player and places 3 Community Cards face down in the middle of the layout.

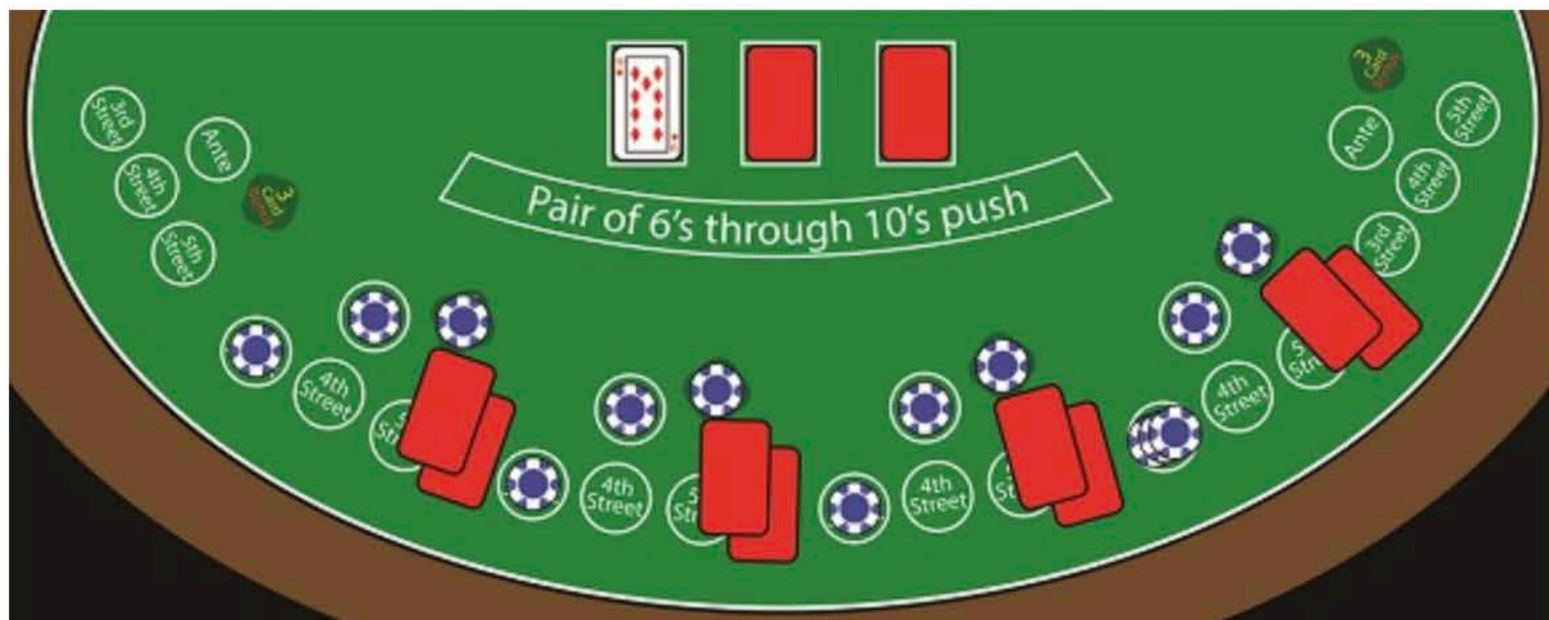

Once the Dealer has dealt all the cards, the Players have the choice of either folding or making a 3rd Street bet of 1x, 2x, or 3x the Ante. (If a Player chooses to fold, he forfeits all previous Bets in action)

In the Image below, the Left, Middle Left, and Middle Right Players decided to place a 1x the Ante bet on the 3rd Street bet. Because the Right Player knows he is going to win at least even odds, he places the maximum 3x the Ante bet on the 3rd Street bet.

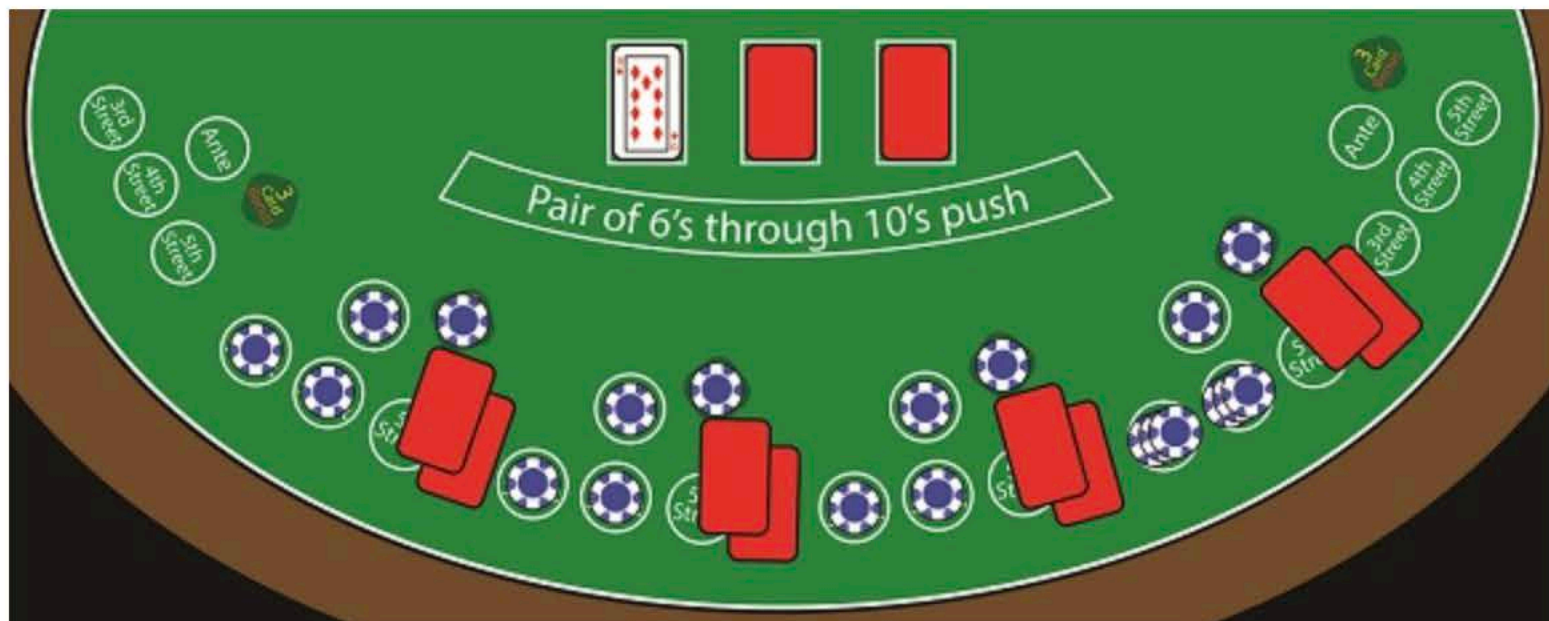

Once all the Players have placed their 3rd Street Bets, the Dealer then reveals the first Community Card.

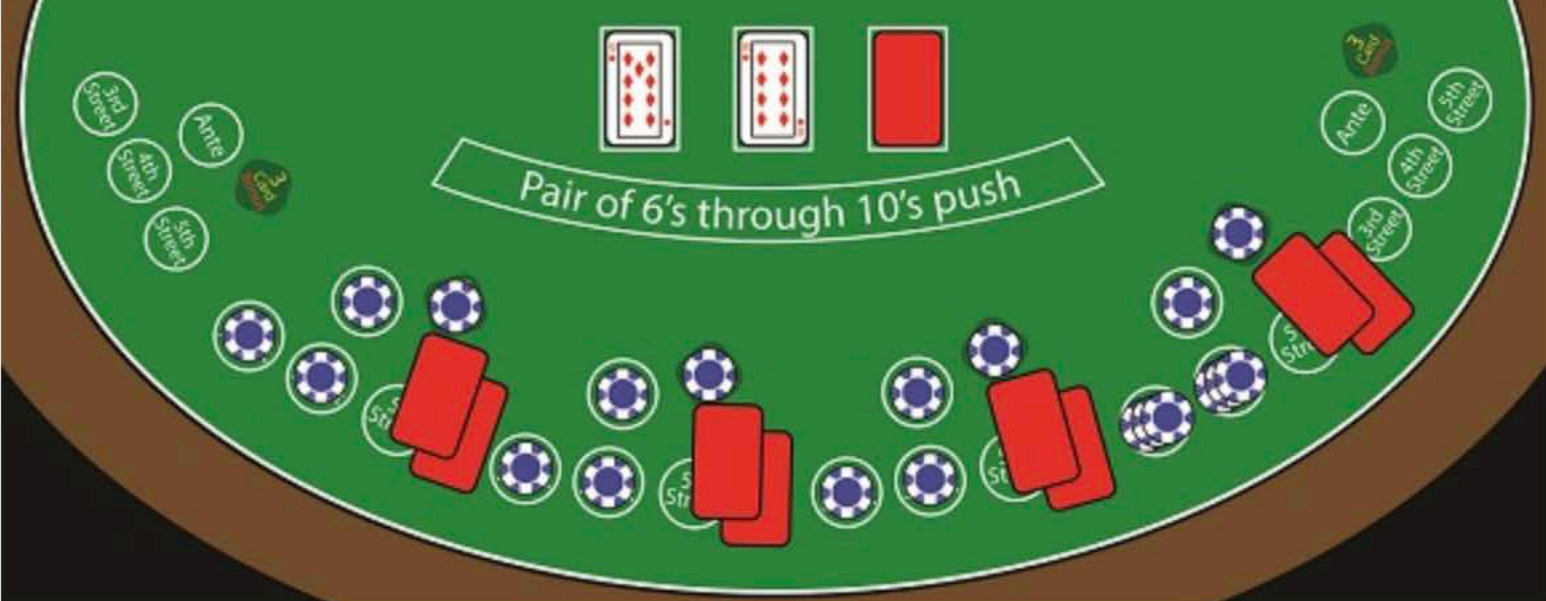

After the Dealer reveals the first Community Card, the Players have a choice: fold or make a 4th Street bet of 1x, 2x, or 3x the Ante.

In the Image below, the Left, Middle Left, and Middle Right Players decided to place a 1x the Ante bet on the 4th Street bet. Once again, because the Right Player knows he is going to win at least even odds, he places the maximum 3x the Ante bet on the 4th Street bet.

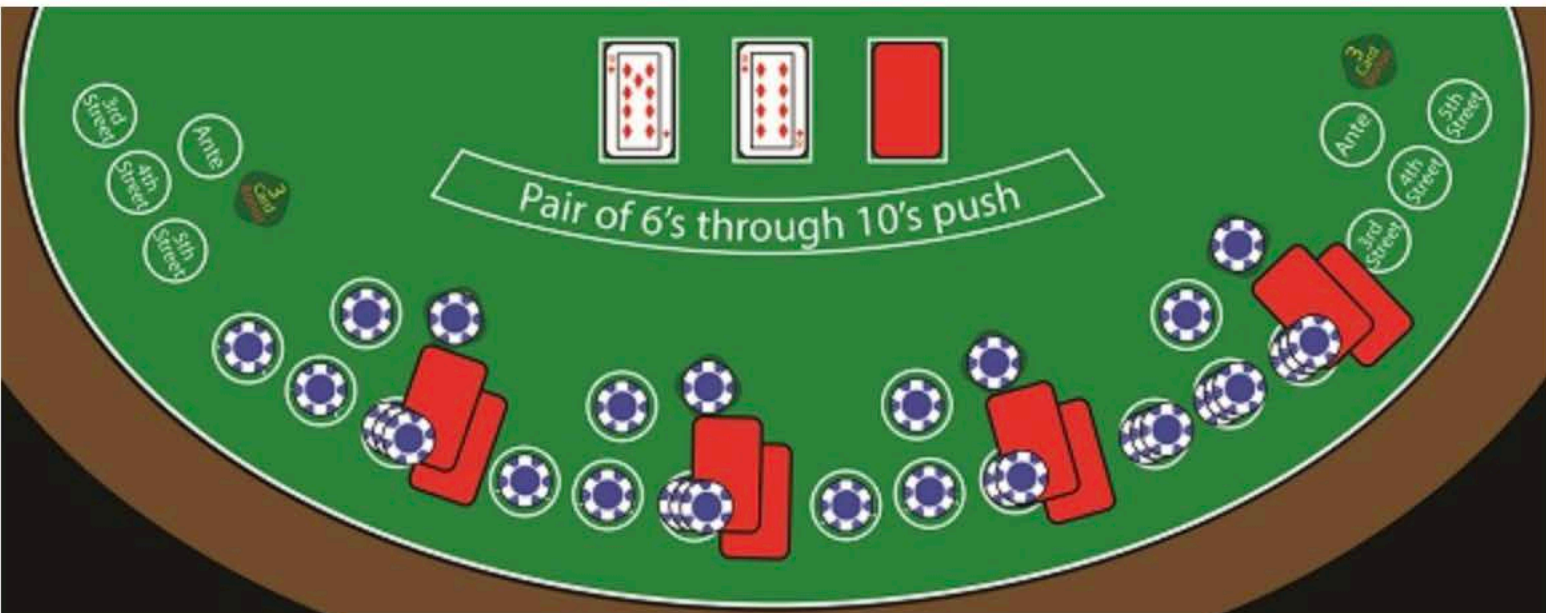

Once all the Players have placed their 4th Street Bets, the Dealer then reveals the second Community Card.

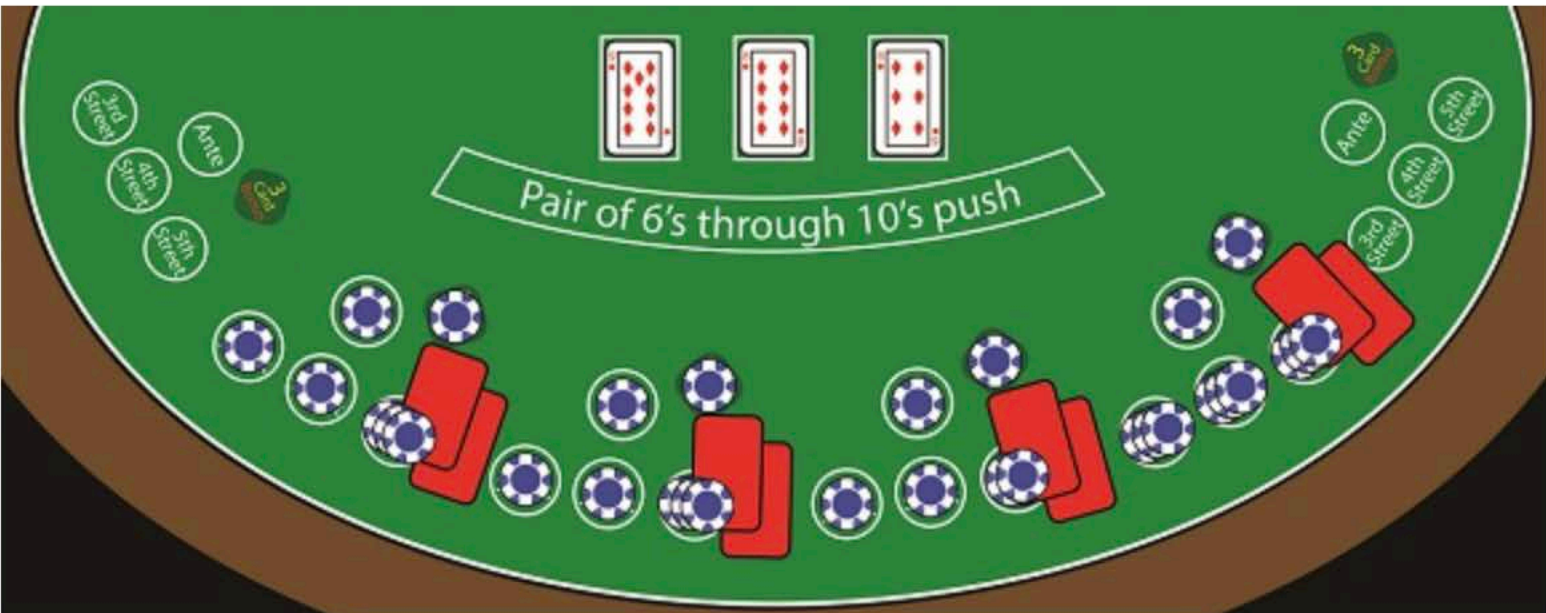

After the Dealer reveals the second Community Card, the Players again have the choice to either fold or stay in the game by making a 5th Street bet of 1x, 2x, or 3x the Ante.

In the Image below, the Left, Middle Left, and Right Players decided to place a 3x the Ante bet on the 5th Street bet. The Middle Right Player decided to place a 2x the Ante bet on the 5th Street bet.

Once all the Players have placed their 5th Street Bets, the Dealer then reveals the third and final Community Card, and resolves all the wagers left in action.

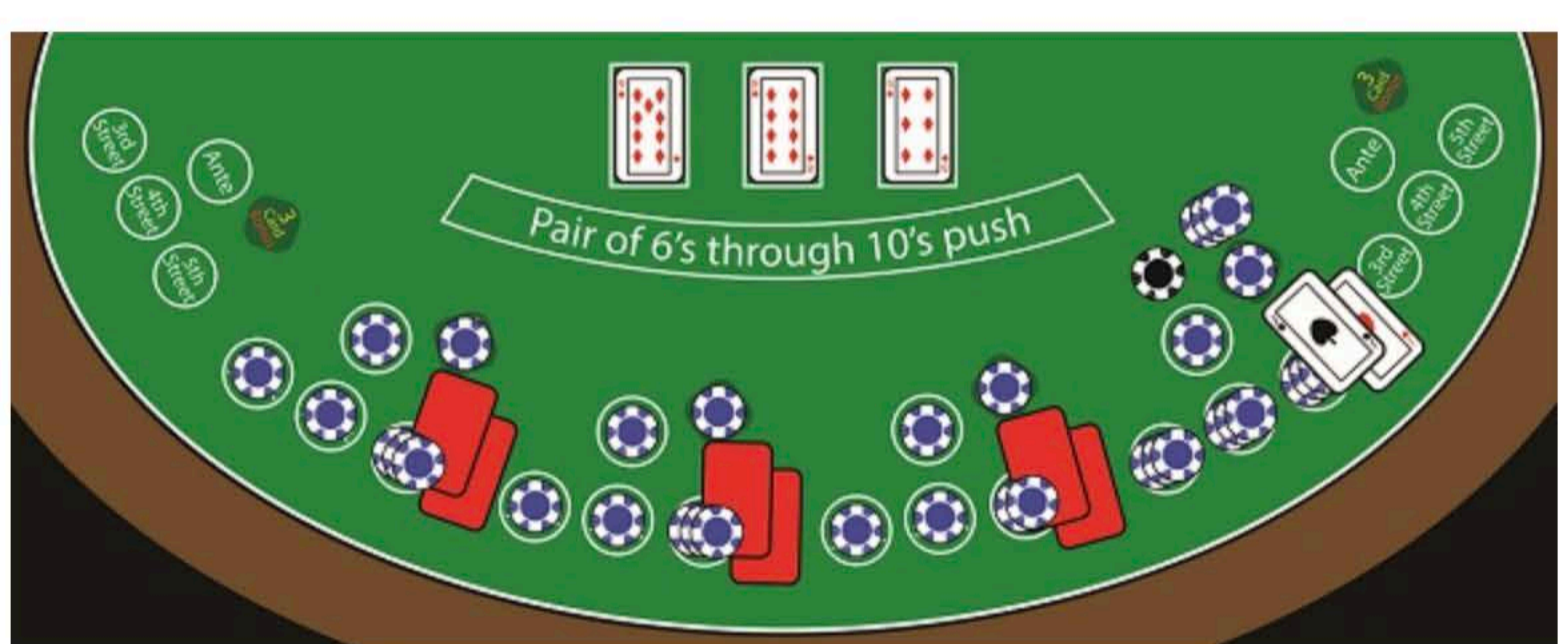

Hand	Odds
Royal Flush	500 to 1
Straight Flush	100 to 1
Four-of-a-Kind	40 to 1
Full House	10 to 1
Flush	6 to 1
Straight	4 to 1
Three-of-a-Kind	3 to 1
Two Pair	2 to 1
Jacks or Better	1 to 1
Pair of 6's to 10's	Push

3 Card Bonus Hand	Odds
Straight Flush	40 to 1
Three-of-a-Kind	30 to 1
Straight	6 to 1
Flush	3 to 1
Pair	1 to 1

The Right Player has a pair of Jacks, which is his highest cards even when combined with the 9, 8, and 6 of Diamonds from the Community Cards.

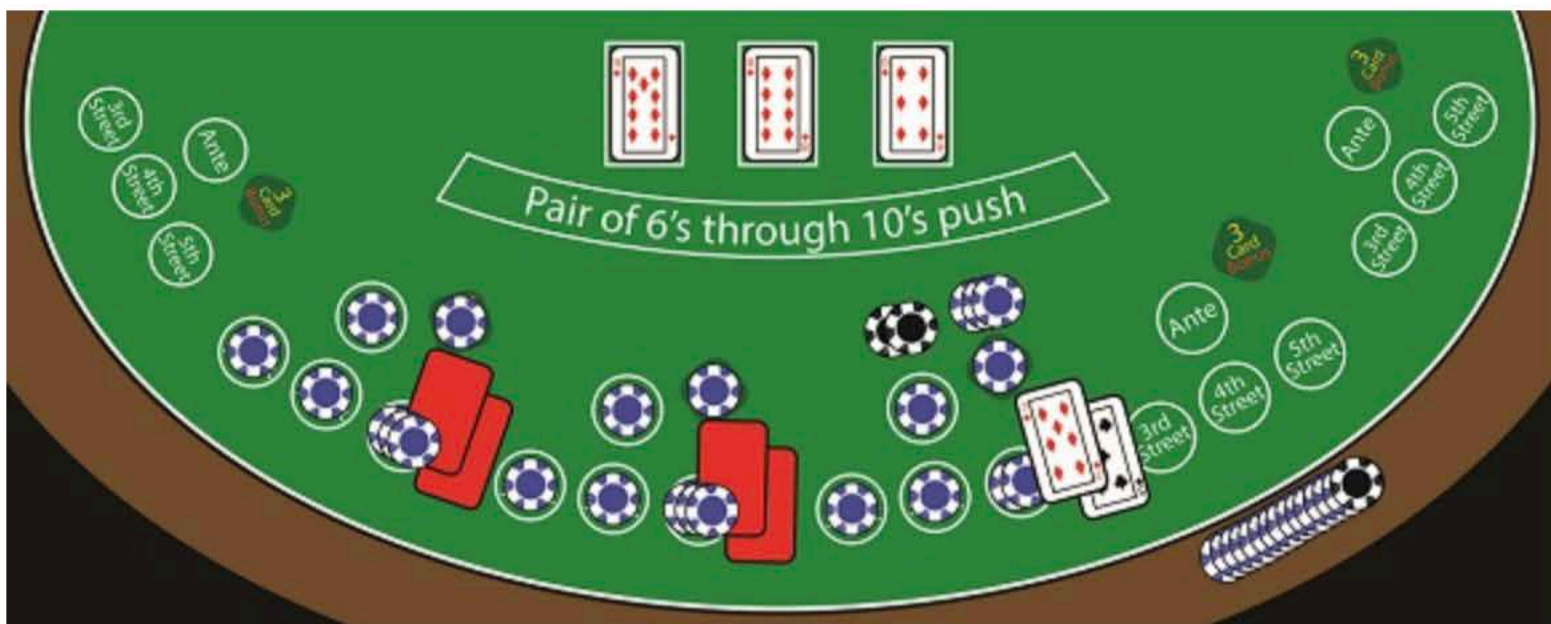

The Right Player wins a 1 to 1 payout on his Ante, 3rd Street, 4th Street, and 5th Street wagers. Because the 3 Card Bonus bet wins if the 3 Community Cards contain a Pair or better, the Right Player also wins a 3 to 1 payout on his 3 Card Bonus wager for the 3 Community Cards Flush.

The Right Middle Player has a 7 of Diamonds and a 5 of Clubs, which makes a Straight when combined with the 9, 8, and 6 of Diamonds from the Community Cards.

The Right Middle Player wins a 4 to 1 payout on his Ante, 3rd Street, 4th Street, and 5th Street wagers. The Right Middle Player also wins a 3 to 1 payout on his 3 Card Bonus wager for the 3 Community Cards Flush.

The Left Middle Player has a 5 and Ace of Diamonds, which makes a Flush when combined with the 9, 8, and 6 of Diamonds from the Community Cards.

The Left Middle Player wins a 6 to 1 payout on his Ante, 3rd Street, 4th Street, and 5th Street wagers. The Left Middle Player also wins a 3 to 1 payout on his 3 Card Bonus wager for the 3 Community Cards Flush.

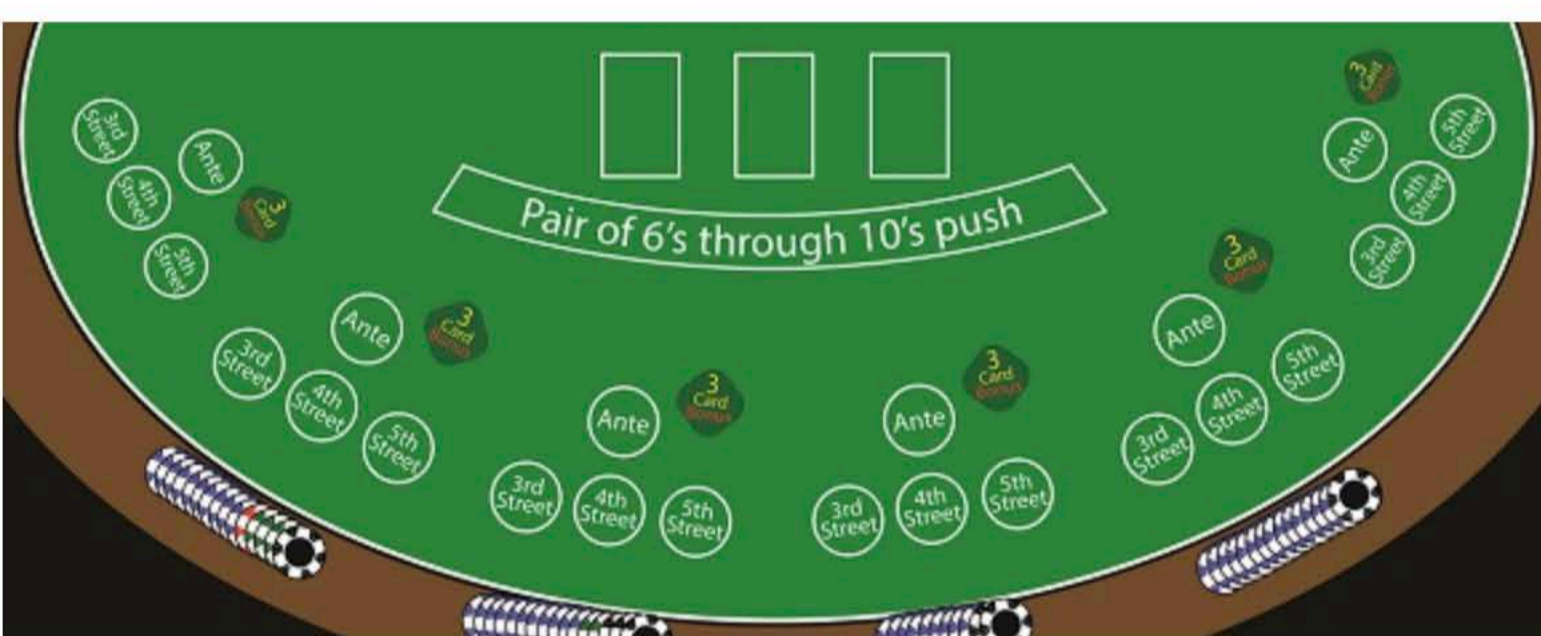

The Left Player has a pair of 8s, which makes a Three-of-a-Kind when combined with the 8 of Diamonds from the Community Cards.

The Left Player wins a payout of 3 to 1 on his Ante, 3rd Street, 4th Street, and 5th Street wagers. The Left Player also wins a 3 to 1 payout on his 3 Card Bonus wager for the 3 Community Cards Flush.

Once the Dealer has paid all the wagers, he collects remaining cards and a new turn starts.

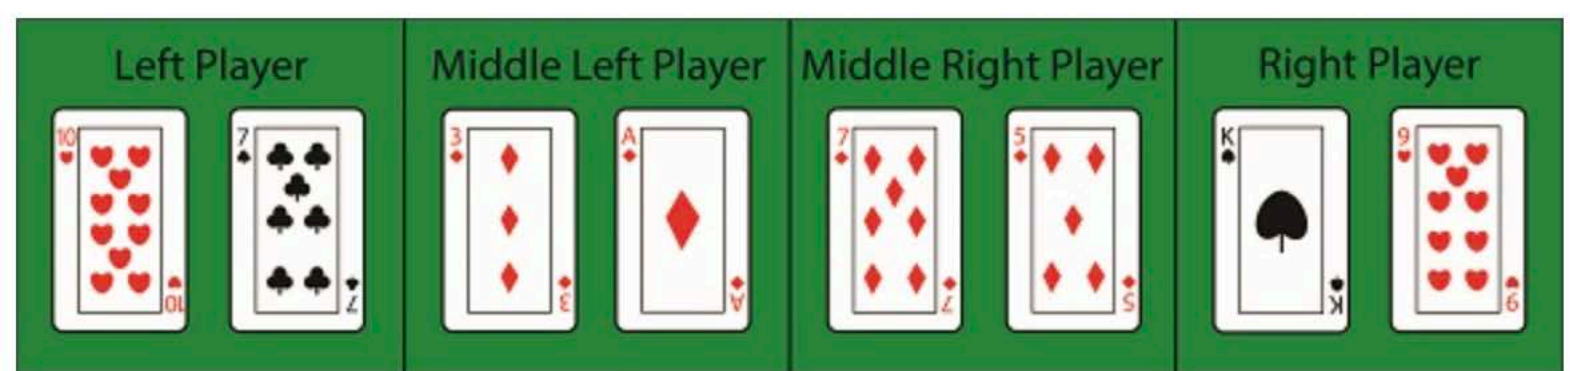

Progressive Payout

Progressive winners are determined from the 2 Cards dealt to each Player and 3 Community Cards. The Optional Progressive Bet qualifies you for all or part of the increasing jackpot, and the bet wins with a Straight or better.

In the Image below, all 4 Players placed an Ante bet and a Progressive Bet.

After the Dealer has revealed all 3 Community Cards, the Dealer pays out the optional Progressive Bets.

Progressive Bet	Payout
Royal Flush	100% of the Jackpot
Straight Flush	10% of the Jackpot
Four-of-a-Kind	\$300
Full House	\$50
Flush	\$40
Straight	\$30

In the above example, the 3 Community Cards are a 9, 8, and 6 of Diamonds. The Left Player has a 10 of Hearts and 7 of Clubs, which makes a Straight when combined with the Community Cards, so the Left Player wins \$30. The Left Middle Player has a 3 and Ace of Diamonds, which makes a Flush when combined with the Community Cards, so the Left Middle Player wins \$40. The Right Middle Player has a 7 and 5 of Diamonds, which makes a Straight Flush when combined with the Community Cards, so the Right Middle Player wins 10% of the Jackpot. The Right Player has a King of Spades and a 9 of Hearts, which makes a 9 Pair when combined with the Community Cards. Because a Straight or higher is needed to win the Progressive Bet, the Right Player loses his Progressive Bet.
